---

## EDUCATION

**McGill University** (graduating Dec 2017)

**09/2012 – current**

Montréal, Québec, Canada

Studying computer engineering and civil engineering (GPA: 3.41/4)

## WORK EXPERIENCES

**HOGODIGITAL – Web Marketing Solutions**

**Full Stack Web Developer**

**07/2016 – 09/2016**

- Developed fully customized WordPress site with a team of web developers using PHP and AngularJs.
- Successfully created and deployed a web-based lottery game plugin for an online media company.
- Optimized user experience of websites by recreating interactive widget (interactive gallery, calendar, email system etc.)

## MY PROJECTS

**BREEZY SKELE – a skeleton for WP backend + plugin (Currently in Development)**

- Implemented an add-on framework to improve the lack of code trackability and readability in WP (decluttered function.php file to 30% of the original size)
- Optimized Word Press development process by creating custom hooks, class and functions (20% increase in efficiency)

**TRAVEL SIMPLE (A Wealth Simple Hack from Decode Hackathon)**

- A travel planner web app that allows users to estimate an amount to put into their investment plan that it could fund their dream of traveling around the world.
- Developed with Ruby on rails and AngularJs.
- Successfully implemented Nomadlist API and Google Flight API to estimate the lowest cost of travel and the minimum saving plan for the trip.

## SKILLS

**Programming Languages**

Python, Java, C, C++, PHP, Ruby

**Web Programming**

Html5, Css3, JavaScript, Less, JQuery, Bootstrap, MySQL, Word Press, Git, JIRA, Gitbucket, AngularJs, Node.js, Ruby on Rails

## LANGUAGES

English, French, Spanish, Chinese Cantonese, Chinese Mandarin
